Company overview

IN ONE LINE

Dispatch Goods is the managed reuse service that replaces single-use foodware for businesses.

ABOUT

Founded in 2019, Dispatch Goods is the managed reuse service that replaces single-use foodware for businesses. Through company-operated wash facilities and route-based service in major metropolitan markets across the United States, Dispatch Goods delivers, collects, washes and returns reusable foodware for corporate campuses, hospitals, universities, food service operators and meal delivery companies. Its AI-enabled systems track every item, verify every wash and give customers data on their environmental impact.

WHAT WE DO

- Deliver reusable foodware to customer sites on a set schedule.
- Collect it after use, wash and sanitize it in company-operated facilities, and return it clean.
- Track every item and verify every wash, and report environmental impact to customers.

WHO WE SERVE

- Healthcare
- Higher education
- Corporate dining
- D2C meal and grocery delivery
